No experience necessary - Safety instructors on site - Plenty of raffles
50/50 Draw - Exotic guns will be available to shoot for a small fee*

Help Make Hope A Reality!

This event was conceived in 2016 on behalf of a 9 year old St. Catharines girl, the only known case in the Niagara Region, living with this rare, incurable disease that slowly destroys the organs in the body. The goal was to bring awareness and raise money for research, since most research money comes from private donations and fundraisers. Since then she has grown into a lovely young lady who doesn't want to be defined by her disease. We have renamed the event to the "Shoot for Cystinosis" to highlight the disease and help all the young children afflicted by this disease. Children with this disease are often consigned to taking cysteamine every 6 hours, growth hormone injections, eye drops hourly, and up to 35 additional doses of medications each day. Cystinosis is a disease so rare that it affects only 2,000 children worldwide.
